SAFE SUMMER TIPS

Summer months bring longer days, more opportunities to be outside and vacations. This leads to changes in routines, which is a risk factor for suffering an unintentional injury. According to Safe Kids Worldwide, the rate of unintentional injury escalates during the summer months. Keeping kids safe during summer months can be challenging. However, following these 5 tips could improve your chances of an injury-free summer.

1. Each year many children are seriously injured by lawn mowers. Power lawn mowers have proved to be the most dangerous. [Learn more.](#)
2. Drowning is the second leading cause of injury-related death for children ages 1 to 4. Incidents of drowning increase during summer months. [Learn more.](#)
3. Allowing children to play with fireworks is dangerous. Sparklers can burn at 2,000 degrees, which is as hot as a blowtorch. [Learn more.](#)
4. More than 320 children die each summer due to heat stroke from being left in hot cars. Most of these children are younger than age 3. [Learn more.](#)

Injuries at playgrounds account for more than 205,000 emergency department visits each year. [Learn more.](#)
