

Please include the following note in your next newsletter. Thanks much

The Wisconsin Department of Health Services requires the reporting of district immunization compliance. The Student Immunization Law dictates what the district must do. If your child is not up to date on required vaccine(s), you will be receiving a letter indicating this. This includes children who are "Behind Schedule" for a required vaccine or those with "No Record" of immunizations on file at school. To remain compliant please provide the date your child received the required immunization. Failure to do so may result in a fine or exclusion from school. We are required to exclude students who are non-compliant. Readmission during the exclusion period can occur if the parent provides proof that the required vaccine(s) was received or, if the parent claims a waiver for health, religious, or personal conviction reason. The Student Immunization Law has been passed in order to keep our children well from vaccine preventable diseases.

Thank you for your attention in this important matter. If you have questions, please feel free to call 662-7959  
or 662-7946
