

## Makerspace Donations Desired

If you don't know what a Makerspace is, it is a creative Do It Yourself space where we can gather to create, invent, and learn.

During their time in this space, kids will have the opportunity to show what they know about problem solving,, technology, basic engineering, science, and math. They will do this by using their imaginations to design and create a variety of items using a wide range of supplies. Since, we are just getting started developing a true Makerspace, we are in need of donations of supplies for our creative tasks.

Please consider making a donation of any of the items below for our use that day! Some of these might be things you have around the house, in your recycle bin or sitting in a closet. Other items might need to be purchased. We appreciate any and all donations.

Please have all items you plan to donate to school by Wednesday, April 6th, as our first class is getting ready for their adventure soon after that! Thank you in advance for your assistance and generosity! Donations after that time would be appreciated as well.
