## "V" Is For Vulture!

The Suamico School Forest Committee is inviting you to learn about one of nature's most misunderstood creatures – the vulture. The vulture is the most crucial avian scavenger in the world. This presentation will help you learn to appreciate how much the vulture contributes to maintaining the beauty and health of our environment! Please join us for this live vulture presentation!

When: Thursday, May 2, 2013

Where: Suamico Elementary School

Time: 5:00-6:30 p.m.

Kim, naturalist from Bay Beach Wildlife Sanctuary, will have two presentations – 5:00 and 5:30. She will be bringing a live turkey vulture for a close encounter! We will also be offering a "vulture" craft and a walk in the School Forest.

Please RSVP by April 22 so we know how many to prepare crafts for. Call 662-9802 or 662-9801.
